NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying un-audited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an entity's auditor.

1. BASIS OF PREPARATION

These interim financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles ("GAAP") based on accounting policies and practices consistent with those used in the preparation of the annual audited consolidated financial statements. The interim consolidated financial statements do not include all information and note disclosures require by Canadian GAAP for annual financial statements, and therefore should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2005.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) Principles of consolidation

These accounts include the accounts of Aurcana Corporation and its wholly-owned subsidiary, Aurcana de Mexico S.A. de C.V., a Mexican corporation.

(b) Variable interest entities

Effective January 1, 2005, the Company adopted the recommendations of Canadian Institute of Chartered Accountants Handbook Accounting Guideline 15 (AcG-15), Consolidation of Variable Interest Entities, effective for annual and interim periods beginning on or after November 1, 2004. Variable interest entities (VIEs) refer to those entities that are subject to control on a basis other than ownership of voting interests. AcG-15 provides guidance for identifying VIEs and criteria for determining which entity, if any, should consolidate them. Adoption of this accounting policy has not affected the Company's financial statements.

(c) Mineral properties

The Company capitalizes all costs related to investments in mineral property interests on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. Costs are deferred until such time as the extent of mineralization has been determined and mineral property interests are either developed or the Company's mineral rights are allowed to lapse. All deferred mineral property expenditures are reviewed, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment. When the carrying value of a property exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, joint venture expenditure commitments to the Company's assessment of its ability to sell the property for an amount exceeding the deferred costs, provision is made for the impairment in value.

The amounts shown for acquisition costs and deferred exploration expenditures represent costs incurred to date and do not necessarily reflect present or future values. These costs will be depleted over the useful lives of the properties upon commencement of commercial production or written-off if the properties are abandoned or the claims allowed to lapse.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

From time to time the Company may acquire or dispose of a mineral property interest pursuant to the terms of an option agreement. As the options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as property costs or recoveries when the payments are made or received. When the amount of recoveries exceeds the total amount of capitalized costs of the property, the amount in excess of costs is credited to income.

(d) **Foreign currency translation**

Foreign currency balances, including those of the integrated foreign subsidiary, are expressed in Canadian dollars on the following bases:

(i) Monetary assets and liabilities, at the rate of exchange in effect as at the balance sheet date;
(ii) Investment in and expenditures on mineral properties, at historical exchange rates; and
(iii) Revenues and expenses, at the average rate of exchange for each quarter.

Gains and losses arising from this translation of foreign currency are included in net loss for the period.

(e) **Loss per share**

Loss per share computations are based on the weighted average number of common shares outstanding during the period. Diluted loss per share has not been presented separately as the outstanding stock options and warrants are anti-dilutive.

(f) **Use of estimates**

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and would impact future results of operations and cash flows.

(g) **Stock-based compensation plans**

The Company accounts for stock options granted to directors, employees and consultants using the fair value method. The fair value of each option granted is estimated on the date of grant using the Black-Scholes option pricing model and charged to earnings over the vesting period with a corresponding increase in contributed surplus. Upon exercise of the stock options, consideration received together with the amount previously recognized in contributed surplus is recorded as an increase to capital stock.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(h) **Asset retirement obligations**

An asset retirement obligation is a legal obligation associated with the retirement of tangible long-lived assets that the Company is required to settle. This would include obligations related to future removal of property and equipment, and site restoration costs. The Company recognizes the fair value of a liability for an asset retirement obligation in the year in which it is incurred when a reasonable estimate of fair value can be made. The carrying amount of the related long-lived asset is increased by the same amount as the liability. The adoption of this accounting policy has not affected the Company's financial statements.

(i) **Amortization**

The Company provides for amortization of its equipment as follows:

Vehicles – Straight-line over 5 years
Furniture and equipment - Straight-line over 5 years
Computers - Straight-line over 5 years

(j) **Comparative Figures**

Certain figures have been reclassified to conform with the current period's presentation.

3. FINANCIAL INSTRUMENTS

(a) **Fair value**

The carrying values of cash, accounts receivable, advances and accounts payable approximate their fair values because of the short maturity of these financial instruments.

(b) **Credit risk**

The Company's financial asset that is exposed to credit risk consists primarily of cash to the extent that it is held in foreign institutions.

(c) **Interest rate risk**

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary current assets and current liabilities.

(d) **Currency risk**

The Company is exposed to foreign currency fluctuations to the extent expenditures incurred by the Company are not denominated in Canadian dollars. As at June 30, 2006, the Company had investments in mineral properties that require the Company to make payments in US dollars and US dollar work commitments (note 5). The Company's ability to make these payments and complete its work commitment obligations will be affected by currency fluctuations.

4. REALIZATION OF ASSETS

The investment in and expenditures on mineral properties comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the establishment of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal.

5. INVESTMENT IN AND EXPENDITURES ON MINERAL PROPERTIES (Continued)

The investment in and expenditures on mineral properties comprise a significant portion of the Company's assets. Realization of the Company's investment in these assets is dependent upon the establishment of legal ownership, the attainment of successful production from the properties or from the proceeds of their disposal.

(i) **La Negra Mine, Queretaro State, Mexico**

On February 2, 2006, the Company signed a LOI with Reyna Mining & Engineering S.A. de C.V. ("Reyna") to acquire the La Negra silver-zinc-copper-lead mine in Queretaro State, Mexico, approximately 250 kilometres northeast of Mexico City.

Under the terms of the LOI, the Company and Reyna will form a joint venture whereby the Company will own an 80% interest in La Negra, and Reyna will own 20%. Reyna has a LOI to acquire 100% of the La Negra mine from Industrialas Penoles S.A. de C.V. ("Penoles"). Under the terms of the acquisition Aurcana will own an 80% interest in the La Negra Mine and Reyna will own 20%. Aurcana will be responsible for the cost of the acquisition and up to US$3.0 million in expected costs and working capital to bring the mine back into production. The total cost of the acquisition is US$3.0 million of which US$2.0 million is to be paid to Penoles on closing (paid). The remaining payment of US$1.0 million, will be due 12 months from closing. Under the terms of the LOI Aurcana is required to pay Reyna US$25,000 on execution of the LOI (paid), US$500,000 and US$725,000 on the date which is twelve and twenty four months respectively from the execution of a definitive joint venture agreement. Aurcana will issue to Reyna three million shares of which one million shares will be issued on the execution of a definitive agreement (issued) and one million shares on each of the dates, which is twelve and twenty fours months, respectively, following the execution of a formal joint venture agreement. In addition the Company will issue 1,000,000 warrants at a price of $0.25 to Reyna (issued). Each warrant will entitle Reyna to purchase one common share for a period of two years.

A finder's fee of 4% of the gross transaction of US$4,250,000 in the amount of US$170,000 was paid in cash.

(ii) **Altiplano Project – Mexico**

On September 3, 2003, the Company announced it had signed a Letter of Intent ("LOI") with Exploraciones del Altiplano S.A. de C.V ("Altiplano"), whereby the Company can acquire a 100% interest in five gold-silver exploration properties over four years subject to a 3% net smelter return royalty ("NSR"). The Company committed to conduct an aggregate of 5,000 metres of drilling on the five properties in the first year. On signing the formal agreement, the Company paid Altiplano US $15,000 and issued Altiplano 200,000 common shares on February 20, 2004 at a deemed price of $0.21 per share ($42,000 included in land costs). Following completion of the first year of exploration commitment on each of the individual properties, should the Company wish to continue with its option on any particular property then the Company must pay Altiplano US $50,000 and issue 200,000 common shares (issued). In order to complete the 100% interest in each individual property, the Company is required to fund US $200,000 of exploration in year two, US $300,000 in year three and US $400,000 in year four and make cash and share payments, respectively, of US $50,000 and 200,000 shares at the end of year two, and US $100,000 and 200,000 shares at the end of years three and four. One percent of the NSR on any property may be purchased for US $1,000,000.

5. INVESTMENT IN AND EXPENDITURES ON MINERAL PROPERTIES (Continued)

(ii) **Altiplano Project – Mexico** (Continued)

The Company also granted 1,000,000 incentive stock options exercisable up to 2008 with exercise prices of $0.13 to $0.14 per share to the owners of Altiplano in their capacity as consultants to Aurcana. 800,000 of these stock options were cancelled upon termination of the agreement in 2005.

Based on exploration work completed to December 31, 2005, the Company discontinued work on four of the five properties known as the Cerro Blanco, Sabinas, Veta Venado and Penoles and will not proceed with any further work on these four properties. As a result, acquisition and exploration expenditures of $385,045 were written off at December 31, 2005. The Altiplano agreement was terminated on August 5, 2005 and neither party is bound by any contractual obligation. The remaining property under the agreement is La Virgen.

On April 25, 2005, the Company entered into an agreement with Mauricio Hochschild & Compania S.A.C. (“Hochschild Agreement”) relating to the exploration of La Virgen. Under the terms of the Hochschild Agreement, Hochschild must spend a total of US $2,500,000 on exploration and pay the owner a total of US $300,000 over four years, pay the required property taxes to the Mexican government and make property payments to Altiplano. Hochschild must spend US $150,000 in the first year, US $500,000 in year two, US $850,000 in year three and US $1,000,000 million in year four and pay the owner US $25,000 on signing, US $75,000 by April 4, 2006, US $100,000 by April 4, 2007 and US $100,000 by April 4, 2008. Once Hochschild has spent US $2,500,000 and made payments to Altiplano, Hochschild will have earned a 70% interest in the property. Aurcana’s obligation is to issue 200,000 common shares to Altiplano on each anniversary of the agreement for four years at which point Aurcana will have a 30% interest. Should Hochschild withdraw or default on this agreement the Company has the option to continue making the expenditures and required payments that Hochschild defaulted and by doing so earn 100% interest in the property. Should the Company not exercise this option and comply with its part of the agreement, the Company will only earn its 30% interest in the property. Once Hochschild and Aurcana have earned their interests, the property will be subject to a 3% NSR, which can be repurchased within six years from the date of signing by paying US $1,000,000 to buy 1% of the NSR, by paying US $3,000,000 to buy 2% of the NSR or by paying US $6,000,000 to buy 3% of the NSR. The Company elected to terminate the agreement in May 2006 and as such has written off all acquisition and deferred exploration costs to date.

5. INVESTMENT IN AND EXPENDITURES ON MINERAL PROPERTIES (Continued)

(iii) Real de Catorce Project - Mexico

On June 29, 2004, the Company received regulatory approval for its acquisition of a 100% interest in the Real de Catorce silver property located in San Luis Potosi State, Mexico. Under the terms of the LOI, the Company can earn a 100% interest in the Real de Catorce project subject to a 3% NSR. On signing the formal agreement, the Company will pay Real de Catorce US $5,000. Following completion of the first year exploration commitment of US $100,000, should the Company wish to continue with its option, then the Company must pay Real de Catorce US $50,000 and issue 100,000 common shares. In order to complete the purchase of a 100% interest, the Company would fund US $200,000 of exploration in year two, US $300,000 in year three and US $400,000 in year four and make cash and share payments of US $50,000 and 100,000 shares at the end of year two and US $100,000 and 100,000 shares at the end of years three and four. One percent of the NSR may be purchased for US $1,000,000.

On July 25, 2005, the Company announced it would not be proceeding with the Real de Catorce project as the Company had a LOI signed with Genco Resources Ltd. ("Genco") to joint venture the property but the terms of the underlying agreement were changed by the property owner and Genco decided not to proceed with the execution of a final agreement. The property owner subsequently cancelled Aurcana's option. As at December 31, 2005, all deferred exploration expenses had been written off.

Balance – June 30, 2006	68,122,030	$ 23,269,338	$ —

During the period ended June 30, 2006, the Company:

(i) Completed a non-brokered private placement of 23,350,000 units at $0.20 per unit for gross proceeds of $4,470,000. Each Unit consisted of one share (a “Share”) and one half of a share purchase warrant. One full warrant (a “Warrant”) permitted the holder to purchase a further share (a “Warrant Share”) for a period of 12 months from closing at a price of $0.25 per Warrant Share, provided that if the closing price of the Company’s shares as traded on the Exchange was at or over $0.45 per share for 20 consecutive trading days, the Company would have the right to accelerate the expiry of the Warrants upon giving 30 days notice to the holders thereof.

(ii) Pursuant to the accelerated expiry notice, issued 12,246,300 common shares pursuant to the exercise of 12,246,300 share purchase warrants at a price of $0.25 per warrant for $3,061,575;

(iii) Issued 1,000,000 shares at a deemed price of $0.25 to Reyna pursuant to the exercise of the definitive agreement with respect to the joint venture agreement to acquire the La Negra Mine (note 5);
